

SpacePigMath.com

Space Pig Math is an action game for practicing your times tables - up to 12x12 - with satisfying, visceral feedback and retro-inspired visuals and sounds. Blast through waves of asteroids and aliens to save Space Pig's Friends - they in turn will give you awesome powerups to help you out!

The game rewards correct, consecutive, and quick answers with over-the-top explosions and effects. It is easy and accessible for the novice, but the challenge is also there for the pros.

Each times table is covered through four unique modes:

- Start with Review to gain a visual understanding of multiplication.
- Relax in Puzzle mode, blasting answers at your leisure.
- Take a break in Free-For-All - pure arcade action, no math required.
- Then put it all together in Challenge mode - use your reflexes and smarts to save Space Pig's Friends!

You can try the first two levels for free - the game contains a single in-app purchase to unlock the rest. No wifi connection is required to play, except when making the purchase.

Whether you are completely new to multiplication, or a times-tables ninja, everyone will enjoy this game.

Space Pig Math was crafted with love, by a game-industry veteran, in the belief that in this age of technological marvels, there is no reason that practicing times tables can't be genuinely FUN!
